

Christian Horizons is proud to announce that it has established an organizational goal to become a Dementia Friendly Ministry™.

The Pathway Memory Support® program

- Christian Horizons will offer community-based and residential care dementia services that provide life-affirming, evidence-based care practices and relationship-centered care delivered by well-trained and caring associates.

Centers of excellence in our communities – Offering education, technical assistance and support for other faith-based senior organizations seeking to become a certified Dementia Friendly Ministry.

Dementia friendly organization –

All associates will receive training about Alzheimer’s disease or other dementia. Associates will also be given an opportunity to complete a certificate of achievement related to their dementia care studies. Christian Horizons residents and families will be invited to become dementia friends through Dementia Friends USA.

Touch the Spirit® activity program

– Residents will benefit from this program created to honor religious and spiritual traditions. This includes religious services, spiritual readings, hymns, and helping people with dementia stay connected to nature, friends, family, the arts, and purposeful activities.

A commitment to fight stigma –

People living with dementia should not be defined by their illness. Christian Horizons supports efforts to reduce stigma and increase access to services with a focus on dignity and quality of life.
